Uki exercise 01

01. Start
     Input num
     If num=5
     Display '5'
     Else if num=6
     Display '6'
     Else
     Display 'undefined'
     End if
   End

02. Start
     Input num
     If 0<num<10
     Display 'blue'
     Else if 10<num<20
     Display 'red'
     Else if 20<num<30
     Display 'green'
     Else
     Display 'it is not correct color option'
     End if
   End

03. Start
     x=0,
     While x<=100 then
        x=x+5
         Display x
    End while
   End

04.
Beging
n=0
total=0
max=0
min=0
avg=0
While n!=5:
     a=input enter a number

```
        total=total+a
        If max>a:
                Then max=a
        Eles:
                min<a:
                min=a
        n=n-1
ave=total/5
print(avg)
print(max)
print(min)
End if
End
```
